

Catalyst AOK-78-61

Alumina catalyst is used in Sulfur Recovery Units (SRU) as active bed support. Unlike inert ceramic balls used as a bed support, the catalyst provides an extended service life of the catalyst bed. Applied in refining and petrochemicals, gas plants and metal manufacturing.

Specification:

Νō	Parameter	Standard value		
		Grade A	Grade V	
1.	Appearance:			
	- Color	White, shades	White, shades are allowed Sphere	
	- Shape	Sph		
2.	Pellet size, diameter, mm	6-10	10-17	
3.	Bulk density, g/cm ³	0.75±0.15	0.75±0.15	
4.	Surface area, m ² /g	>250	>200	
5.	Crushing strength, MPa	>5	>4	
6.	Loss on ignition (200-800°C), %	<5	<5
