

Catalyst АОК-73-24

Chromia-alumina catalyst for dehydrogenation of lower paraffin hydrocarbons applied in petrochemicals for production of monomers for synthetic rubber and MTBE synthesis.

Specification:

№	Parameter	Standard value
1.	Appearance:	
	- Shape	powder
	- Color	Grey and green
2.	Bulk density, g/cm ³	1.0-1.4
3.	Surface area, m ² /g	130 ± 30
4.	Abrasion resistance, %	>90
