

## Alumina for chromatography АОК-63-21

Alumina is used as adsorbent for chromatography, pharmaceuticals, R&D and analytical laboratory applications.

### Specification:

№	Parameter	Grade B
1.	Appearance	White powder, inclusions of dark color are allowed
2.	Particle size distribution: mass content of particles, %:	
	- > 0.160 mm, within the range	-
	- 0.160-0.100 mm	-
	- < 0.100 mm, within the range	>50
3.	Loss on ignition (200-800°C), %	<2
