

Catalyst

АОК-75-50 (Z-10)

Alumina manganese oxide catalyst for complete oxidation of carbon monoxide (CO), VOC and methane (CH₄). Applied for emission treatment of enterprises processing wood and producing slab materials (chipboard, plywood), as well as various chemical industries.

Specification:

№	Parameter	Standard value
1.	Shape	Grid inside a ring
2.	Color	Light brown, grey shade is allowed
3.	Pellet size, mm:	
	- Outer diameter	26±3
	- Wall thickness	2.0±3
	- Length	17-25
4.	Bulk density, г/см ³	0.60±0.15
5.	Crushing strength, N/mm	>4.5
